

Everything under control

The directives

All Truma liquid gas heaters are certified for heating while driving, anywhere in Europe.

In order to make the gas supply perfectly safe while driving and meet all heating requirements while driving wherever you are in Europe, we provide:

- The SecuMotion regulator with integrated gas flow monitor
- The DuoComfort changeover valve for the two-cylinder system
- High-pressure gas hoses with hose rupture protection

You are safe with these Truma products. Even in the event of an accident! Put your faith in Truma, the market leader with more than 50 years of experience!

Truma equipment now complies with all European regulations and standards for heating while driving.

The benefits to you:

SecuMotion gas pressure regulator and DuoComfort changeover valve

- Safe heating while driving
- Complies with all European regulations, standards and directives
- Can be used anywhere in Europe because of country-specific high-pressure hoses
- No more gas supply problems because of different cylinder valves

Gas remote switch

For conveniently shutting off the gas supply from the interior

BBQ point

For connecting external equipment such as gas barbecues or gas lamps

Worry-free travelling

The new European standard for caravanning gas technology

Comfort on the move

Nice and warm, completely safe

Freezing cold outside, lovely and warm inside. And all this while you are driving. "Is that safe?", you might ask. Of course it is – thanks to Truma gas technology.

We look after you

European gas supply

Truma safeguards your gas supply – anywhere in Europe.

Truma's newly developed gas accessories make it possible to heat safely while driving – anywhere in Europe. You enjoy the two-fold benefits: firstly, the Truma SecuMotion and DuoComfort products comply with all European directives. Secondly, these products can be used in any European country because of their country-specific gas hoses.

Our comfort accessories such as the SecuMotion regulator and the DuoComfort changeover valve provide you with even more luxury in your leisure vehicle.

No more goosebumps

Everything on board?

SecuMotion

The new standard!

The 'Drive-Save'

The SecuMotion is the basis of your safe and comfortable gas supply. The gas cylinder is connected using country-specific hoses. The integrated gas flow monitor also allows you to heat while driving throughout Europe.* You are therefore on the safe side during any trip!

- Complies with all directives pertaining to heating while driving
- Optimum basis for DuoComfort two-cylinder system
- Complies with EN 12864
- Can be used anywhere in Europe with country-specific gas hoses

* Heating equipment directive 2001/56 EG

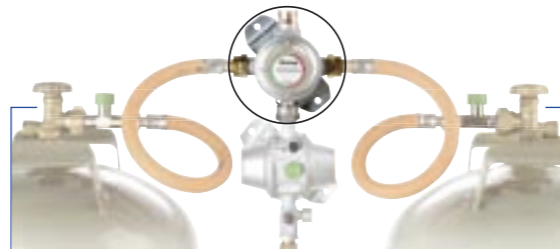

SecuMotion

DuoComfort

Uninterrupted gas comfort

The automatic changeover valve for the two-cylinder system effortlessly changes over from the empty operating cylinder to the reserve cylinder. A visual indicator on the regulator shows you the status (full/empty). This makes it the optimum addition to SecuMotion or the wall-mounted GOK regulator. The DuoComfort can be used anywhere in Europe because of its country-specific gas hoses and complies with all directives pertaining to heating while driving.*

- Automatically switches to reserve cylinder
- Visual indicator shows status of operating cylinder
- Complies with EN 13786

DuoComfort

DuoComfort L remote indicator

Significantly more DuoComfort

It conveniently indicates the operating status of your gas cylinders inside the vehicle. Thanks to EisEx the regulators do not freeze up, even at minus temperatures.

Perfectly equipped

This is what matters in your new vehicle

If you also wish to heat while driving throughout Europe, you must ensure that your vehicle is equipped with the SecuMotion gas pressure regulator from Truma when you buy it.

Simply safe

High-pressure hoses with rupture protection

Your SecuMotion regulator and your DuoComfort changeover valve can be used throughout Europe with country-specific high-pressure hoses. This means that you will never have gas supply problems.

Truma accessories

Your specialist dealer will be pleased to retrofit your vehicle.

Whether you heat while driving or only when stationary – you are on the safe side with our products.
